Forecast for Wednesday 04 Nov 2020

Weather: Occasionally heavy showers, falling as snow above about 800m, becoming less frequent through the early hours with clear spells developing. Any showers die out soon after dawn to leave a bright morning with some good spells of sunshine. However the sunshine turns increasingly hazy through the afternoon as cloud above the summits increases, the cloud thickening enough to bring some evening rain.

Chance of cloud free mountain/hill tops above 800m: Around 75% at dawn with occasional cloud above 600m soon rising close to 100% with little or no cloud below summit level. Chances fall considerably during the evening.

Visibility: Very good falling to several kilometres in showers and evening rain and a kilometre or less in snow showers.

Met Office Aberdeen Meteorologist's View
Temperatures in sheltered southern glens close to freezing at dawn.

Forecast for Thursday 05 Nov 2020
Weather: Rather cloudy to the west of the Plateau through much of the day with perhaps a little light drizzle. However eastern and southern hills and mountains should see some bright or sunny spells developing through the day.

Maximum wind: Westerly 30-40mph, with gusts around 60mph over ridges and summits, gradually easing 20-25mph

Chance of cloud free mountain/hill tops above 800m: Around 25% at first and more generally west of the Plateau with periods above 600m, but becoming close to 100% in the south and east as early cloud lifts above summits and breaks.

Visibility: Good, becoming very good in south and east, but falling to several kilometres at times in drizzle.

Temperature: **Glens:** Around 4 or 5 Celsius at dawn rising to plus 12 Celsius in west and 14 Celsius in south and east.
At 800m: Around plus 6 Celsius
Freezing level: Above the summits.
